Products

It's A Snap!!!

NOW Available in Grade 80 & 100

In an effort to provide you with the best we took your feedback and re-designed the CM Hammerlok

The Pat-lok™ is a two-piece zinc die cast retainer that fits around the Hammerlok load pin and positively locks the pin in place keeping the Hammerlok assembly together.

Simply fit the two cast halves together around the load pin until the halves form a circle then push the standard stainless steel c-clips into the ring groove on each end until they snap in place that's all there is to it!

When you want to take it apart simply slip a small screwdriver into the relief groove until it is under the c-clip and pry it up. When c-clips snap free pull the cast halves apart and slide the load pin out.

* Patent pending
